

CUT. EXAMINE. ACT. **KEEP DANGER AT A DISTANCE** **F6A + POWERHAWK**

Remotec is proud to offer the Power Hawk System Upgrade Kit, developed with TSWG, for ANDROS F6A owners. This revolutionary system allows for the full use of the Power Hawk while maintaining a safe distance through the agility and dependability of the F6A, allowing you to perform:

**FORCIBLE ENTRY, REMOTE CUTTING OPERATION,
VEHICLE ACCESS, MECHANICAL BREACHING,
OPENING LOCKS, REINFORCED DOORS,
3/8" STEEL PLATE, BURGLAR BARS**

When choosing a robot, choose the platform that offers more accessories and options than the competition. Call today for more information and pricing from a member of the Remotec Sales Team:

A TOOL AS VERSATILE AS THE JOBS YOU NEED TO PERFORM.

Only the F6A and Power Hawk combination provides this level of total mission control while keeping danger at a distance.

Remotely access the area you need with the Power Hawk's spreaders or cutters and then set the tool down to gain full use of your F6A's gripper. When you're ready, pick the tool back up for more work or to head back. The whole process happens remotely without ever placing a technician in harm's way.

All this power is contained in a lightweight, easy to store, electric powered system that's safe for indoor or outdoor use. No hydraulics. No hazardous fluid leaks or fumes. No special storage requirements.

HOW DOES POWERHAWK SPREADING AND CUTTING COMPARE?

Utilizing advanced aerospace actuation technology, the Power Hawk system delivers forces greater than similar class hydraulic "jaws" type tools. Affordability, dependability, and versatility combine to make the Power Hawk a must have system for any F6A owner.
